Greg,

Wanted to make sure we're still on schedule for 5/28 kickoff. I'm coordinating with our Albuquerque people on getting a health physicist in to assist. Probably going to stay in the Harahan/Elmwood area. The attached scope of work is what I had put together for ARS. Is this what START will be tasked to do? Is the EPA ERT going to be present and covering any of this or should we plan on handling it? If so I think we'll need two people, the HP and probably Hadwin. Do you plan on cutting a removal TDD? Or "converting" the assessment TDD? Need any cost estimates from us?

Thanks
David
